Features

Water softening ingredients of Alu Deko increase the washing effecacy. The product is suitable for

- washing of instruments and utensils
- washing of equipment used in treatments and for care

Product declaration

Polycarboxylat	< 5 %
Triethanolamine	< 5 %
Sodium Metasilicate	< 5 %
Phosphonate	< 5 %
Gluconate	< 5 %
NTA	5 - 15 %

Product pH 13
Ready-to-use solution pH 10.3

Instructions for use

Connect Erisan Alu Deko drum to the automatic dosimeter of the washer. If other detergent has been used in the machine rinse carefully the hoses before using Erisan Alu Deko.

Recommended dosage is 30 - 70 ml/wash. The material to be washed, quality and quantity of water affect the dosage.

Arrange the instruments to be cleaned loosely in the machine. Put hose pipes loosely in appropriate holders in the machine. Make sure that the water jets will have access to all surfaces of the instruments to be washed.

Best washing results can be achieved in temperatures between 45 - 55^{o} C. The washer thermally disinfects the cleaned and rinsed instruments and the inside of the machine in accordance with the selected programme.

Please note

Irritating. Wear protective gloves.

Storage

At room temperature. Shelf life 3 years.

Package size/ Product code

3 x 5 l	80387	EAN 641260 080387 7

Environmental impact

The packaging is made of PE-HD plastic, which is an environmentally friendly, fully recyclable material and may be disposed of by burning. The product should not be released straight into the environment.
